MUHAMMAD SHAMIN FARHAN

Full-Stack JavaScript Developer | React, Next.js & AI Integration

Sharjah, UAE | +971 54 423 7609 | farhan.dev24@gmail.com | linkedin.com/in/shaminfarhan | github.com/farhanparru | leetcode.com/u/shaminmuhammad116

PROFESSIONAL SUMMARY

Full-Stack JavaScript developer specializing in React.js and Next.js, with approximately 3 years of combined hands-on development experience (project-based practice, training, part-time and full-time employment), building production marketplace, e-commerce, ERP/POS, and business communication platforms for the UAE and GCC markets, and a React Native mobile app for iOS and Android (store release pending). Hands-on with UI/UX implementation from Figma designs, REST APIs, Node.js, PostgreSQL/MongoDB, and third-party integrations. Practical AI integration through Gemini-powered watch photo scanning, and currently developing a Google Gemini API shopping assistant. Works as a Full-Stack JavaScript Developer at Smart Supply Portal Est., contributing to platforms including the TradeAuct luxury marketplace and live auction platform.

CORE TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, Next.js (SSR/SSG), Redux Toolkit, PWA, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, Figma-to-code UI
Backend: Node.js, Express.js, REST API Design, Prisma ORM, JWT & Google OAuth 2.0, API validation, Redis, BullMQ (background jobs)
Databases: PostgreSQL, MongoDB (Aggregation Framework), Prisma — schema & database design
Mobile Development: React Native, Expo, Expo Router — Montres iOS & Android app (built; validation and store release pending)
Cloud & Deployment: AWS EC2, S3, RDS for PostgreSQL, DigitalOcean, Nginx, Vercel — production deployment & troubleshooting
APIs & Integrations: REST API Integration, GraphQL (basic hands-on use), Third-Party APIs, Webhooks, UAE PASS, eBay API, WebRTC
AI Integration: Google Gemini API (watch photo scanning in TradeAuct; shopping assistant in progress), image-based data extraction
Analytics & E-commerce Integrations: Stripe, Tamara, Tabby (payments); DHL, Mawgood, Trend (shipping); GA4 enhanced e-commerce, Google Tag Manager, Search Console, Google Merchant Center, Meta Pixel & Conversions API (CAPI)
Testing & Development Tools: Git, GitHub, GitLab, Postman, Swagger, Playwright, Node.js Test Runner, Sentry, Figma, multilingual SEO

PROFESSIONAL EXPERIENCE

Full-Stack JavaScript Developer — Smart Supply Portal Est.
Sharjah, UAE | Oct 2025 – Present

- Develop full-stack features for a UAE business discovery and B2B sourcing platform across frontend, backend and database layers.
- Develop and deploy features across four production platforms: TradeAuct (marketplace and live auctions), Montero Watch, Demarquee Watch, and Montres.ae (luxury e-commerce), each with an admin panel.
- Design REST APIs, database schemas, authentication, and payment and shipping integrations; resolve production, deployment, and database issues through root-cause analysis.

Full-Stack Developer — Technomagic Solutions India Pvt Ltd (Cloud Qlobe)
Part-Time | Jan 2025 – May 2025

- Developed and maintained full-stack features (React.js, TypeScript, Node.js, MongoDB) and API integrations for Cloud Qlobe, a cloud telephony platform (details under Featured Projects).
- Troubleshot platform reliability issues, resolving API failures and backend errors reported in production.

Software Developer — TYEM Ventures Pvt Ltd
Full-Time | Aug 2024 – Jan 2025

- Built and maintained a cross-platform ERP/POS billing application using Electron.js and PWA technology, with online/offline operation (details under Featured Projects).
- Integrated receipt-printer hardware, WhatsApp Catalog, and webhook-based order processing.

FEATURED PROJECTS

TradeAuct — Luxury Marketplace & Live Auction Platform
tradeauct.com | seller.tradeauct.com | Seller Dashboard GitHub | Backend GitHub | Buyer Frontend GitHub | TradeAuct Admin
Tech Stack: Next.js · React · Node.js · PostgreSQL · Redis · BullMQ · Stripe · AWS

- Designed and built a multi-application marketplace ecosystem — buyer marketplace, seller dashboard, and centralized backend API — supporting international and GCC operations, with UI/UX designed in Figma (Canva for visual assets).
- Implemented the admin management platform for marketplace operations, including product/listing, seller, order, auction, customer, and platform-management workflows.
- Built seller onboarding, listing management, and a real-time bidding/auction engine with bid validation, reserve pricing, and full auction lifecycle management.
- Designed Stripe-based payment architecture (checkout, payment holding/release, seller payouts, commissions, refunds) and a seller wallet system for earnings and withdrawals.
- Implemented UAE PASS authentication and eBay API integration for seller product data retrieval, supporting marketplace listing workflows.
- Integrated Google Gemini API (Gemini 2.5 Flash with automatic model fallback) to scan watch photos in the seller listing flow, extracting brand, model, reference number, dial, condition, and accessories to reduce manual data entry.
- Integrated Mawgood (GCC), Trend (local UAE), and DHL (worldwide) shipping/courier APIs, and implemented MaxMind GeoIP-based IP geolocation for country detection and location-aware checkout defaults.
- Deployed the platform on AWS EC2 with Nginx reverse proxy, S3 storage, and RDS PostgreSQL, using Redis/BullMQ for background job processing; monitored and resolved production deployment and server configuration issues.

Montero Watch & Demarquee Watch — Luxury Watch Brand E-Commerce Platforms

monterowatch.com · demarqueewatch.com | Montero Frontend GitHub | Montero Backend GitHub | Demarquee Backend GitHub | Montero Admin | Demarquee Admin

- Built two independent, bilingual (Arabic/English) e-commerce platforms for luxury watch brands on a MongoDB backend, each with its own frontend, backend, and admin panel for inventory, product, and order management.
- Implemented dedicated admin systems for both brands; the platforms now hold 420+ registered customers and 90+ orders.
- Implemented an advanced NFC-based digital watch verification system — programming NFC cards with unique verification URLs linked to dedicated authenticity pages, enabling customers to tap-to-verify a watch's authenticity directly from their phone.
- Integrated DHL courier workflows for order fulfillment (Montero Watch) and CRM-related customer management workflows (Demarquee Watch).
- Configured Google Search Console and implemented GA4, Google Tag Manager, and Meta Pixel for SEO monitoring, analytics, and conversion visibility across both platforms.

Montres.ae — E-Commerce & Admin Management Platform

montres.ae | Frontend GitHub | Backend GitHub | Montres Admin

E-commerce and administration platform for a multi-category luxury retailer of watches, pens, and accessories.

- Built a full customer-facing e-commerce storefront with multi-currency support for 1,100+ active products (watches, pens, accessories); 225 registered customers and 100+ orders to date.
- Implemented the full admin management platform for product/catalog, inventory, orders, customers, shipping, and store operations — including full product CRUD functionality.
- Built admin email/campaign management and shipping and courier management for order fulfillment.
- Integrated Tamara, Tabby, and Stripe payment gateways for flexible buy-now-pay-later and card payment options.
- Implemented Meta Pixel and Meta Conversions API (CAPI) with event deduplication, GA4 enhanced e-commerce tracking, Google Tag Manager, and Google Merchant Center for product feed and shopping visibility; optimized site performance and SEO.

POS ERP Billing Software — TYEM Ventures

Backend GitHub | POS Application GitHub

- Built and maintained a cross-platform Electron.js and PWA ERP/POS billing application with online/offline operation, WebSockets order processing, and receipt-printer hardware integration.
- Integrated WhatsApp Catalog, webhooks, and a custom XpressBot integration to process online orders in real time; built order and delivery assignment workflows.

Cloud Qlobe — Cloud Telephony & Communication Platform

cloudqlobe.com | Frontend GitHub | Backend GitHub

Cloud telephony and business communication platform for corporate clients.

- Built full-stack features using React.js, TypeScript, Node.js, and MongoDB.
- Implemented WebRTC-based real-time voice/video communication functionality and integrated third-party APIs to support platform features and data workflows.

CURRENT PROJECTS — IN PROGRESS / PENDING RELEASE

AI Shopping Assistant (Google Gemini API) — In Progress

In development, not released | Google Gemini API · E-commerce product discovery

- Developing an AI shopping assistant with the Google Gemini API for product discovery and shopping guidance.
- Ongoing: Gemini API integration. Planned: catalog grounding, conversational flow, storefront integration.

Montres Mobile App (React Native, iOS & Android) — Built; Validation & Store Release Pending

- Built the Montres luxury watch mobile app for iOS and Android (React Native, Expo Router, TypeScript). Try-On and Find My Watch are built; testing, validation, and fixes, then Play Store and App Store release, are pending.
- Built a Virtual Watch Try-On studio: wrist-photo preview scaled true-to-size via ISO ID-1 card calibration (pixels-per-millimeter), with multi-touch gestures (PanResponder, Animated API) and in-studio checkout.
- Fixed Android low-memory crashes during high-resolution camera capture using Expo getPendingResultAsync lifecycle recovery.
- Built a "Find My Watch" sizing engine using case-to-wrist-width coverage to recommend Compact (<58%), Balanced (58-74%) or Bold (75-85%) fits, with deep links into try-on and checkout.
- Wrote 46 passing unit tests (Node.js Test Runner); zero TypeScript errors; iOS safe areas, Android back-button on 16 modals.

ADDITIONAL EXPERIENCE

- Freelance Infrastructure Project (Sevenscape, Dubai, UAE) — Delivered an FTTH fiber deployment across Dubai and Sharjah, enabling high-speed internet for 5,000+ units, coordinating 10+ vendor/client relationships, 15% under budget.

PRACTICAL DEVELOPMENT EXPERIENCE, TRAINING & EDUCATION

- Practical Software Development Experience — Packapeer Academy (Brototype Program), Feb 2023 – Sep 2023 (~7 months) — real-time projects; programming fundamentals, C++, Java
- Full-Stack/MERN Development Trainee — Bridgeon Solutions LLP, Sep 2023 – Jun 2024 (~10 months) — hands-on full-stack training (Certificate)
- Higher Secondary Certificate (HSC), 2023 — National Institute of Open Schooling (NIOS), India
